Rocky Point- Cow Manure Plus

Cow Manure Plus is a certified organic registered garden product; a nutrient enriched premium blend of fully composted, matured cow manure, providing a safe nutrient rich soil conditioner for all gardens.

Available in 30 L bags

Cow Manure Plus

An organic nutrient boost to enhance & sustain plant growth

Available in 30 L bags

Better Earth Selection System

Premium

Certifications

The addition of low-odour Cow Manure Plus will promote well-structured soil essential for healthy plant growth. It will also increase water holding capacity and microbial activity while boosting nutrition. This product is safe for all plants, but is especially beneficial to vegie gardens.

Our composting process takes approximately 4 months where the temperature is monitored and the product is turned regularly until it matures. The matured cow manure is then screened and packed into a quality retail pack ready for sale. No short cuts are taken to produce our premium Cow Manure Plus which is suitable for organic production. Cow Manure Plus is not pelletised.

Features & Benefits

- Cow Manure Plus is fully composted, therefore very low in odour
- Provides excellent amounts of organic matter and nutrient into the soil
- Cow Manure Plus is a great retainer of moisture for the soil
- Improves the soil structure and encourages earthworms and microbial activity
- Product is environmentally friendly

How to use

The fully composted enriched formula can be added into in-ground garden beds, raised garden beds and planter boxes.

Use as a Soil Improver

1. After removing weeds, apply a 50 – 100 mm layer of Cow Manure Plus over the top of your soil.
2. Dig in well to a depth of at least 150 mm.

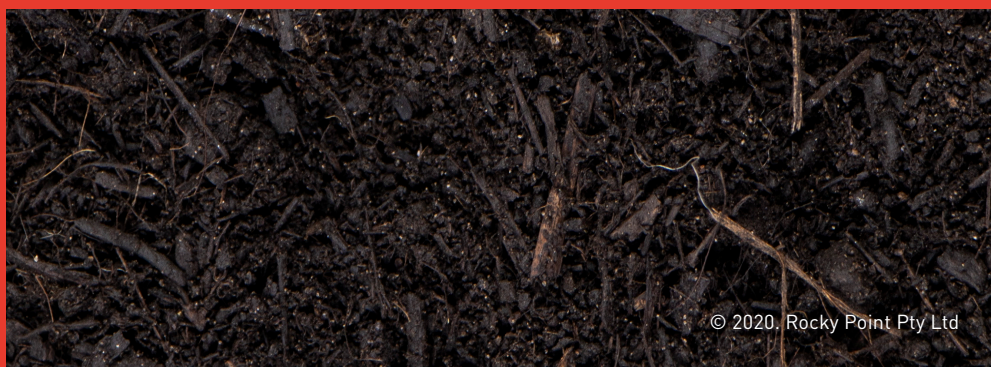

Order Code: 2-RP-COW-30
Size: 30 L
Bags per Layer: 6
Bags per Pallet: 78
